

# Industrial HVAC Database

The Timberline® Office Industrial HVAC Database gives you the information you need to begin estimating productively right away.

Thousands of standard industry items—from boilers and chillers to ductwork—are included to get you started. Just add your own pricing and you're ready to go.

You can also customize the database to fit your unique needs. Timberline Office estimating makes it easy to add your own items, formulas, assemblies, productivity and conversion factors to the database as you estimate.

The database also includes Smart Assemblies™ that let you take off even the most complicated building component, like ductwork, in one step. For example, when taking off a run of ductwork, simply enter one set of dimensions and the assembly will generate labor and material costs for the ductwork, fittings, hangers and more.

Division	Number of Assemblies
General Conditions	4
Pipe - Copper	2
Pipe - Carbon Steel	3
Pipe - Specialties	11
Heat Generation	14
Refrigeration	24
Heat Transfer	30
Air Handling	22
Air Distribution	46

**Industrial HVAC Database** is a part of Timberline Office, fully integrated software created to streamline work and connect the people you depend on to build your business.
